Projekt 5

After reducing the potential safety and health risks of the closed landfills imposed on surrounding areas by restoration, the restored closed landfills could be turned into beneficial use for the public. The Golf Driving Range on the Restored Shuen Wan Landfill at Ting Kok Road, Tai Po is the first landfill afteruse for the public.

Closed in 1995 and restored in 1997, Shuen Wan Landfill has been landscaped and converted into a golf driving range for the use by the general public since April 1999.

The Driving Range provides the following facilities for users:

- \* 145 driving bays;
- \* Par 3 hole;
- \* Sand bunkers;
- \* Practice green area;
- \* car parking spaces; and
- \* changing rooms.

Sai Tso Wan Recreation Ground for soccer, baseball and recreation.

The Hong Kong Jockey Club International BMX Park situated on the Gin Drinkers Bay Landfill was opened in October 2009.

Another portion of the site has been allocated to the Hong Kong Cricket Association for development of temporary cricket grounds.

Jordan Valley Park was opened to public in August 2010.

The Park is featured with a radio-controlled model car racing circuit , horticultural education centre, community garden, children's play areas, elderly exercise corner, jogging track, etc.

JORDAN VALLEY PARK

Ngau Chi Wan Park was fully opened to public in Sept 2010 (its first phase opened in Aug 2009).

- 1 archery range
- 1 basketball court
- 2 jogging tracks
- 1 Tai Chi garden
- 3 elderly fitness corners
- 3 children's play areas
- 6 fitness stations
- 1 maze garden
- 1 rocky pool with buffalo sculptures
- A fee-paying car park with 15 parking spaces (including 2 accessible parking spaces for private cars)
- All Platforms have Toilets (include accessible toilet) and Changing Rooms on the East Side

In 2005, top platform of the former Tseung Kwan O Stage II/III Landfill had been developed into a model aeroplane training field for the Hong Kong Air Cadet Corps to use during weekends and public holidays. It is now used as a training field of Unmanned Aerial Vehicle for land surveying.

## Seoul's Landfill turnaround: Nanjido Park where flowers bloom now

By Priti Prakash | PUBLISHED: 23, Mar 2016, 13:31 pm IST | UPDATED: 06, May 2016, 22:47 pm IST

Seoul: As if the toxic gases spewed by the dumping ground were not enough, Deonar landfill in Mumbai is up in fire. The areas in proximity are choked with smoke and thick fog, second time since the fire erupted in January 2016. Since then it is simmering, with authorities just playing political game over it. Seven days of round the clock fire fighting hasn't been able to bring the fire in control. No amount of foreign jaunts or as they would like to call them 'study tours' by our lawmakers gives them enough wisdom to handle landfills and waste management which I see as directly related to Prime Minister Modi's Swatch Bharat Initiative.

## Design + Construction Updates

### Schmul Park – Completed 2012

Schmul Park, previously a blacktop playground, has been renovated and redesigned by James Corner Field Operations. The asphalt was replaced with colorful rubber-clad play mounds, plantings and other porous surfacing. ...[MORE](#)

### Main Creek Wetland Restoration – Completed 2013

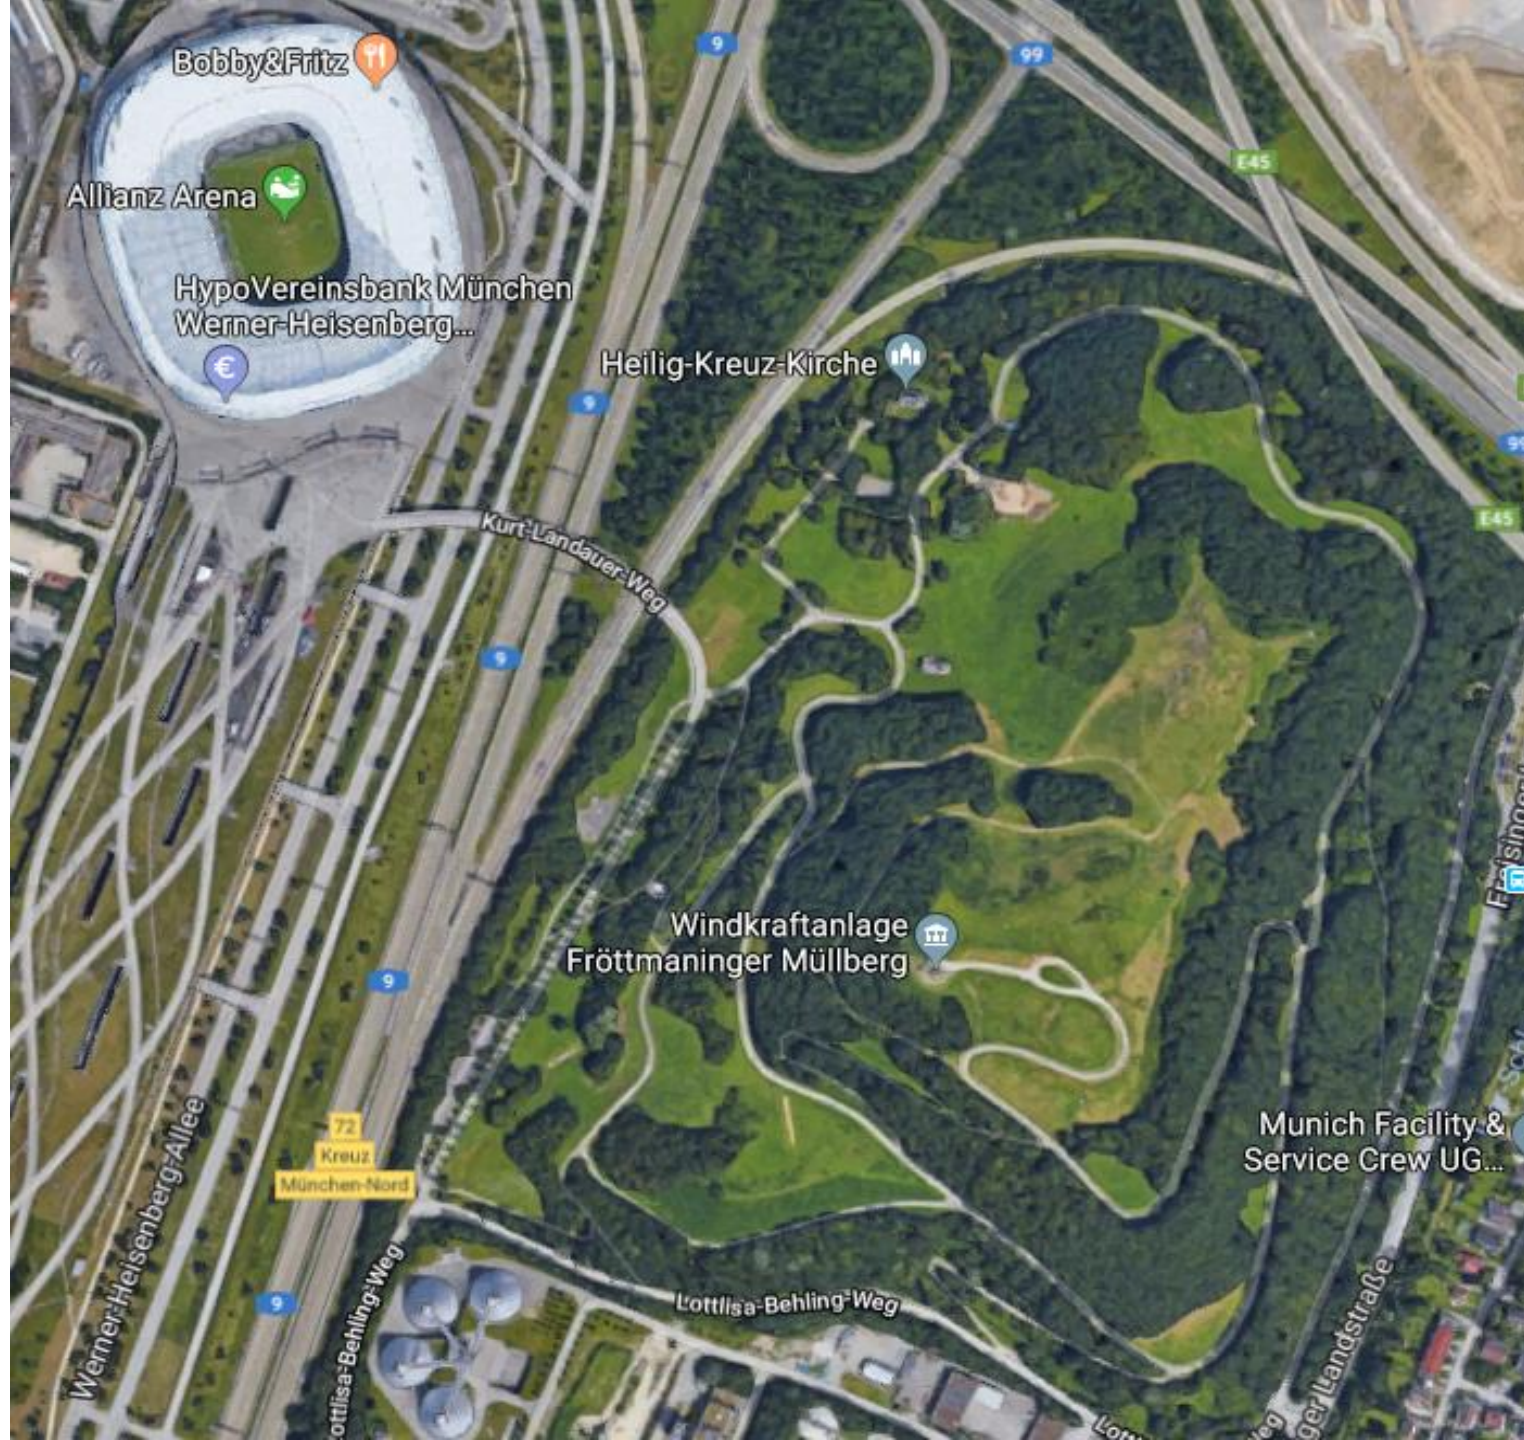

With the support of a grant from the New York Department of State's Office of Coastal, Local Government & Community Sustainability, the Department of Parks & Recreation began restoration of two acres of wetland habitat within the Freshkills Park site. This small project will provide guidance for further wetland restoration projects within the park. The restoration created new salt marsh and coastal habitat; stabilized the shoreline to provide additional protection for habitat under potential threat by climate change and sea level rise and improved water quality through greater interface between coastal plants and tidal waters. ...[MORE](#)

## Tramore Valley Park expected to be open to public early Summer 2016

After a long wait, it has been announced that the Tramore Valley Park in Cork City will open officially to the public in May to June of 2016.

Although the former landfill site hosts a free 5km parkrun every Saturday morning along with some matches and BMX bike activity, the park is closed to the public for the rest of the week except for people going there to recycle materials.

## 2. Hiriya Park, Tel-Aviv, Israel

Tel Aviv's former landfill, called **Hiriya** was a horrifying mountain of garbage that was know affectionately to locals as "Sh!t Mountain". This notorious garbage dump hit its limit in 1998 after reaching 25 million tons of waste. After that the facility was finally shut down and an international competition was held to prevent collapse of the waste into the Ayalon riverbed and resurrect the land into what is now the centerpiece of **Ariel Sharon Park**. Landscape architect and urban planner **Peter Latz** conceived a plan to protect vegetation from the underlying contaminants, inventing a **bioplastic** layer that inhibits methane from reaching the surface.

## 6. Port Sunlight River Park, United Kingdom

**Port River Sunlight Park** is a rehabilitated riverside park that was brought to life on the UK's Wirral coast. After 15 years as a landfill, landscape architecture firm **Gillespies** designed 70-acres of thriving community woodlands with over 12,000 trees. With views overlooking the Liverpool skyline and public access to the River Mersey, the sanctuary has become home to abundant wildlife, wildflower meadows, grasslands, and wetlands.
